PROFESSIONAL SUMMARY

GTM operator and revenue analytics professional with 4+ years of experience building sales motions from zero, converting pipeline data into business decisions, and aligning cross-functional teams around growth programs. I have designed end-to-end outbound GTM processes, owned performance dashboards that drove real-time campaign pivots, and operated simultaneously across sales, marketing, and data functions, the core skillset of a Revenue Operations practitioner.

Trajectory is deliberately RevOps-focused: BCom Marketing Management (University of Pretoria) + Data Science for Managers certification + DataCamp Data Analytics track + hands-on SQL and CRM toolstack proficiency. Currently seeking a RevOps or Product Growth role where sales intelligence, GTM program design, and pipeline analytics intersect.

CORE COMPETENCIES

GTM & Sales Ops: Outbound motion design · Sales process architecture · Pipeline management · OKR-driven execution · CRM workflow build (HubSpot, Apollo, LinkedIn Navigator, Octopus)

Revenue Analytics: Performance dashboards · Marketing attribution · Campaign ROI analysis · Data-to-decision reporting · SQL (intermediate) · Google Analytics · Meta Business Suite

Cross-functional: Product–field interlock · Sales + marketing alignment · Stakeholder reporting · Enablement content · Campaign execution at speed

Tools & Platforms: HubSpot · Salesforce · LinkedIn Sales Navigator · Looker Studio · Tableau · Google Sheets (advanced) · Excel (advanced) · Canva Pro · ChatGPT / AI tooling

PROFESSIONAL EXPERIENCE

Market Development Representative · *TitanX* Jul 2026 – Present

Sole EMEA representative in a 4-person intel-gathering team for a B2B sales intelligence platform, running pre-sale account research that shapes enterprise outbound strategy.

– Run structured discovery calls with individual contributors and managers at target accounts to map each account’s dialer stack, data vendors, connect rates, KPIs, team structure and decision makers before Account Executives engage.

– Achieved a 51% intel rate (30 of 59 scored conversations) in an audited benchmark week, handling 120 objections and turning 82% of “wrong person” responses into named referrals or new leads.

– Log call intelligence in Salesforce and FrontSpin, feeding a shared knowledge base that scores accounts, recommends which to pursue, and informs Account Executive openers and pitch strategy.

– Independently manage EMEA coverage across Salesforce, FrontSpin, CallBlitz and Slack, coordinating asynchronously with a US-based team.

Marketing Data Analyst · *IgniteTech* Jul 2025 – Jun 2026

Owned the analytics layer for a distributed social-media GTM function across multiple product lines. – Built and maintained live performance dashboards tracking content effectiveness, audience engagement, and conversion metrics for 3 team leads, reducing reporting turnaround from ad-hoc requests to a real-time cadence and enabling same-week campaign pivots (est. 30% faster decision cycle).

– Designed KPI frameworks that mapped social engagement metrics to pipeline-stage outcomes for the first time, creating a direct line between content activity and revenue signals.

– Translated complex audience and performance datasets into executive-ready insight decks, informing quarterly content strategy and budget allocation across social platforms.

– Leveraged AI tooling (ChatGPT, Meta Business Suite) to accelerate analysis and automate recurring reporting workflows, freeing team bandwidth for strategy.

Outbound Sales & GTM Architect · *Olive Group* Oct 2024 – Jul 2025

Founding outbound sales hire at a 600-person global edtech firm (Dublin HQ), built the entire GTM motion from zero.

– Designed and owned the full outbound sales process end-to-end: ICP definition, toolstack selection (HubSpot + Apollo + LinkedIn Navigator), sequence architecture, and CRM workflow — establishing the commercial foundation for a new market entry.

– Built and executed targeted outbound campaigns into the hospitality sector (hotels and restaurants) across EMEA, generating qualified pipeline within 60 days of hire.

– Operated as a hybrid SDR + marketing function, writing campaign copy, designing multi-touch outbound sequences, qualifying discovery calls, and iterating messaging based on response-rate data (est. 200+ structured outbound touchpoints per week).

– Contributed directly to GTM strategy as the sole data source for what was working in the field, a product-to-market feedback loop that informed subsequent campaign design.

Digital Marketing Specialist · *CXI Africa* Oct 2024 – Jul 2025

Owned digital GTM execution for a leading African AI & data analytics training institute. – Managed full-funnel digital marketing: content creation, LinkedIn Campaign Manager, Google Analytics, Meta Business Suite, converting impressions into leads through data-optimised campaign execution. – Analysed campaign performance post-launch and used attribution data to inform real-time copy and targeting adjustments, improving conversion quality across paid and organic channels.

Business Development Representative · *SovTech* Feb 2024 – Oct 2024

Enterprise tech sales at Africa's leading software development firm, OKR-driven pipeline generation with rigorous CRM discipline.

– Held a 5 SQL/month quota in a high-velocity environment, driven by a structured daily cadence: 25 cold calls + 25 emails + 25 LinkedIn connections whilst maintaining full HubSpot CRM hygiene across every touchpoint.

– Owned initial Discovery calls end-to-end: qualifying technical requirements, mapping client needs to SovTech's subscription engineering model, and handing off to AEs with structured deal notes and requirement documentation.

– Built target account lists from scratch using Apollo and LinkedIn Navigator, researching company profiles, identifying key stakeholders, and segmenting outreach by industry vertical and deal potential.

Business Development Manager · *Param Solutions* Aug 2023 – Jan 2024

Owned B2B sales strategy and full deal cycle for a staff augmentation firm connecting African engineering talent with global clients.

– Developed independent sales strategy and set quarterly revenue targets, from ICP identification through contract negotiation and post-sale technical scoping with engineering teams.

– Acted as the product-to-field bridge: translating technical engineering capabilities into business value propositions for non-technical buyers, and feeding client requirement patterns back into service design. – Researched industry trends and competitor positioning to maintain commercial differentiation, an analytical function that directly informed pricing and go-to-market targeting.

Junior Marketing Analyst · *Mugode Innovative Solutions* Apr 2023 – Dec 2024 *Cross-functional*

marketing operations support across campaign execution, data analysis, and stakeholder reporting.

– Analysed marketing data to measure campaign effectiveness and surface optimisation opportunities, providing data-driven recommendations to the broader marketing team.

– Managed social media accounts, created content, and executed cross-channel campaigns, building hands-on GTM execution experience across owned and paid media.

Business Development Consultant · *Discovery Financial Services* Jan 2023 – Apr 2023

Sales and client acquisition in a highly regulated financial services environment.

– Generated new leads, managed appointment pipelines, and supported contract auditing for a senior financial advisor, developing commercial discipline in a compliance-heavy B2C environment.

Sales Consultant - Top Performer · *Morecorp* Aug 2021 – Dec 2022

Commission-only sales role (World of Golf, Woodmead) while completing BCom degree full-time. – Ranked consistently top 3 of 10 in a commission-only sales team, earning 2× Top Performer of the Month, including R43,000 in sales during university exam period.

– Developed core commercial fundamentals in a zero-base-salary environment: lead generation, pipeline discipline, objection handling, negotiation, and deal closing.
